

### What Is *TransMath*?

- Comprehensive math intervention solution for students in grades 5-10 who lack the foundational skills necessary for successful entry into algebra and who are two or more years below grade level on state tests
- Aligned to the CCSS
- Includes 3 levels; each level has 9 or 10 units; each unit has 10 or 15 lessons

### Program Components

- Daily lessons
- Assessments
- mBook
- *VmathLive*
- VPORT Data Management System

### Assessments

- Placement Assessment administered prior to start of instruction
- Baseline Assessment administered at the beginning of each level
- Ongoing Assessments administered throughout the lessons and units
- Summative Assessment administered at the end of each level
- Progress Assessments administered 4 times a year

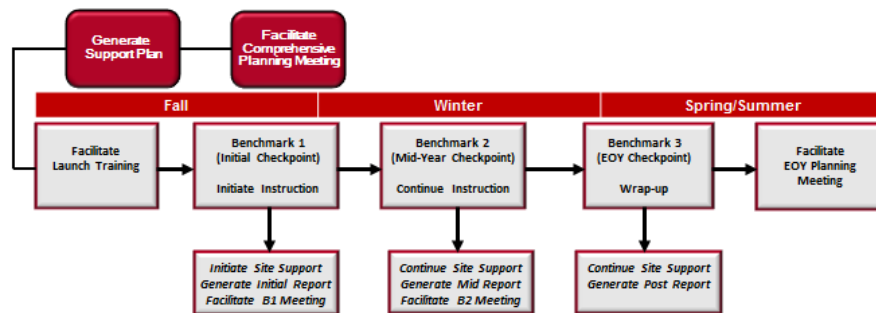

### Expected Gains

- The goal of *TransMath* is to prepare students for entry into Algebra 1

### Implementation Guidelines

- Using a structured, systematic instructional approach, *TransMath* provides 50-60 minutes of daily math instruction that can be used as a core alternative or in conjunction with the core math program.
- Students typically begin in Level 1 and move through each level of the curriculum to complete Level 3.
- Successful implementation of the program involves understanding all aspects of the daily instruction, assessments, and tools which allows the teacher to differentiate instruction and manage assessment data.
- Implementation models and pacing options are available.

### Stages of *TransMath* Implementation

### Service Packages

Various packages are available to provide initial training and ongoing support.

#### Launch Training

*TransMath* launch training prepares teachers to successfully begin the implementation.

- 1 day of face-to-face training (6 instructional hours); up to 40 participants per class
- Virtual training with 1-hour Start-Up session & 1-hour Debrief session

#### Ongoing Support

A menu of services is available for districts to choose from, such as lesson modeling, data entry and analysis, implementation planning, and support with differentiation.

Service Packages
Half Day
